

911 Council Planning Session in Sioux City

May 21, 2009

Here is general information that was talked about at the 911 Council Planning Session in Sioux City on May 21, 2009

- 1) Minutes from previous 911 council meetings—can they be posted on the State Homeland security Web site? Barb Vos advised that his time no because of space.
***Most of the minutes are on the www.Iowanena.org web site under 911 Council
- 2) Barb is looking at doing a RFI (information study) for the Next Gen 911 because there are a lot of questions about cost. She was going to go and talk to Dave Miller about the next step.
- 3) Iowa Statewide Interoperable Communications System board has its own web site
www.ISICSB.iowa.gov you can look on there for minutes from the meetings and other general information about the ISICSB board.
- 4) Talked about the Intersection Sign change that is coming up. Would like something in rules or 34A changed to say that the engineers office maintain them after they are put up.
- 5) Talked about holding 911 Council Meetings in Des Moines because it seems that the attendances for the 911 meetings are low and it does not pay to travel when no one is showing up.
- 6) Talked about the proposed rule changes (mostly the membership issue) who is a valid member that can vote on the local 911 service boards. (the proposed Admin Rule changes can be found on the front page of the www.iowanena.org web site). Any comments need to be to Barb Vos by June 4th.

Next 911 council meeting is in Des Moines at Post 1 on July 15th at 1000 a.m
